Executive Summary

Main Body

Goals and Design Overview

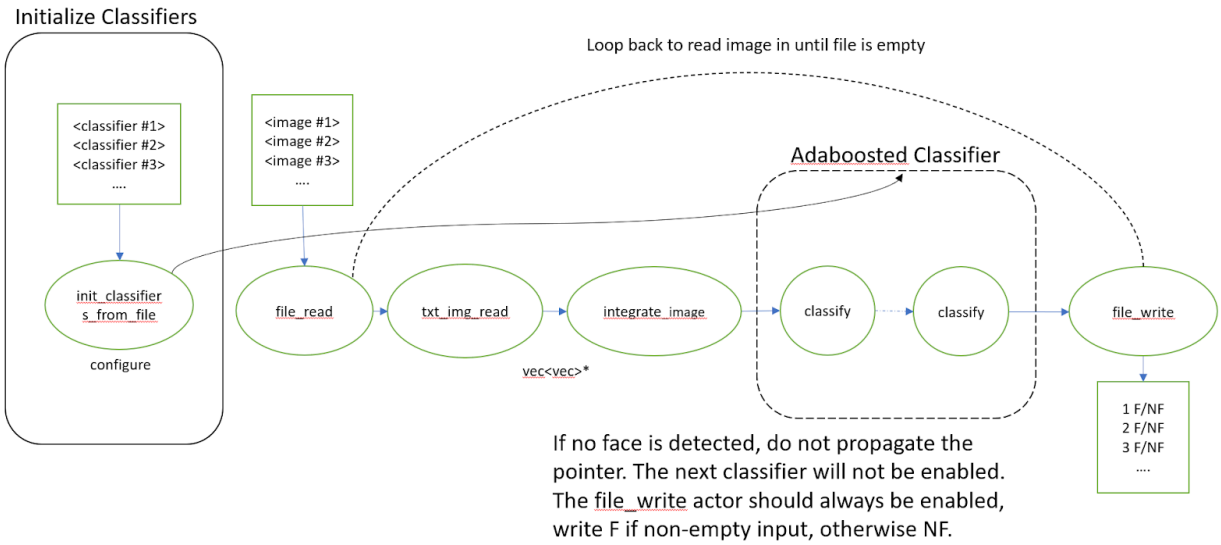

Figure 1: Dataflow Graph for Embedded Face Detector System Application

As illustrated in Fig. 1, the dataflow graph contains six types of actors: init_classifiers_from_file (Classifier Read), file_read (Image Read), txt_img_read (Image to Text), integrate_image (Image Integrate), classify (Classify), and file_write (File Write). In each iteration of the dataflow graph, the
